## Introduction

Tree lined streets and canopied parks are not only inviting, but are natural providers for a healthy quality of life. Trees are central to a flourishing ecosystem. As their beneficiaries, we rely on them to clean our air, provide dynamic buffers, reduce noise, conserve our soil, clean our water, provide wildlife habitat and add to the visual quality of our community.

The goal of this management plan is to provide a strategic approach to sustaining the urban and community trees on a short and long-term basis. This includes the planting, removal, protection and caring for trees in our community and coincides with the Town of Red Hook Comprehensive Plan which states that the Town will strive to ensure the careful stewardship of the natural environment for the enjoyment of present and future generations.

## History

- 2008 a Town Tree Ordinance was established under Local Law No. 1 sections 128 of the Town of Red Hook Code.
- Five member volunteer advisory Tree Commission was appointed by the Town Board to manage our public forests. A recording secretary was appointed to keep an official record of our meetings. The Commission meets once a month and creates a monthly report to the Town Board.
- March 19, 2008 the Tree Commission had its first meeting.
- Designated a Tree City in the Spring of 2012
- Fall of 2010 had pruning workshop for the public conducted by an ISA certified arborist.
- Received the Tree City Growth Award in 2011 and 1012
- Spring of 2008 through the fall of 2013 did community outreach on Arbor Day and Hardscrabble Day.
- Since 2008 developed and continue to do a tree program at the Mill Road Elementary School.
- 2010 received a $\$ 16,000$ Urban Forestry Grant (two year matching grant) to plant 32 trees and conduct a Tree Inventory of some of our streets and roads and the Town of Red Hook Recreation Park.
- Since 2008 have been a member of the NYS Urban and Community Forestry Council and have attended the Annual ReLeaf Urban Forestry Conferences.
- Since 2008 the Tree Commission has offered free tree seedlings on Arbor Day. Nearly 500 tree seedlings and saplings have been distributed.
- Since 2008325 trees and shrubs have been planted during our spring and fall planting sessions. (see addendum)

## Budget

A budget will be prepared at the end of August and presented to the Town Board for approval.
The following items will be considered:

- Purchasing trees
- Planting preparation
- Tree paraphernalia - stakes, irrigator bags and tree wraps
- Inventory update
- Arborist consults
- Educational materials for the community
- Lunch for volunteer planters in the spring and fall
- Tree conferences and workshops for Tree Committee members

Grant writing will be pursued to help support the tree management program.

Arbor Day Poster Winners from Mill Road Elementary School

## Planting Guide

All plantings will be done with the practice of the right tree in the right place with attention to overhead wires, soil volume, soil make up, exposure to salt and other pollutants.

- Planting sites will be selected from the Tree Inventory and requests from community members.
- Planting will take place in our public parks, historical sites, streets, roads and municipal locations. Call Dig Safely New York before digging at 800.962.7962 www.digsafelynewyork.com
- Planting will take place in the spring and fall of the year.
- Planting will be done by community volunteers with guidance from professionals.
- Use the largest tree appropriate for the site for maximum benefit over time.
- Most of the time bare root (BR) trees will be used for their ease of planting. Research indicates that BR trees have a good survival rate and are more cost effective.
- If balled and burlapped (B\&B) trees are used for planting the burlap and wire should be removed. (see addendum)
- No invasive species will be planted. (see addendum)
- Promote diversity and set a future goal of no more than $5 \%$ in any one species, $10 \%$ any one genus and $20 \%$ any one family. New York State has 100 tree species.
- It may be necessary to check soil Ph. at times.
- Trees will be planted in the r-o-w (right of way) along our roads and streets. Usually that would be $25^{\prime}$ from the center of the road. However there is growing support in many towns and cities to plant in the b-r-o-w (beyond the right of way) and setback planting that provides a healthier site for the tree and still provides public benefit.
- No trees should be planted in tree lawns smaller than $4^{\prime}$. The typical tree needs a soil volume of at least $4 \prime \times 4^{\prime} \times 4^{\prime}$ ( 64 cu feet).
- Consider planting in groups when appropriate.
- The tree inventory states that the stocking level in the Town of Red Hook is $67 \%$. The national average is $60 \%$. It is the goal of the Tree Committee to maintain the $67 \%$ stocking level.

## Trees and Construction

- Monitor the site during construction
- CRR (critical root radius) DBHx1.5=CRR - soil compaction is the single largest killer of trees on construction sites. 90 to $95 \%$ of a tree's root system is located in the top $3^{\prime}$ of soil and more than half is in the top $1^{\prime}$. Construction activities that sever more than $40 \%$ of roots located within the CRR will result in a tree that is in imminent danger.
- Storage areas and traffic route should be located safely away from the CRR of trees.
- Improper handling or disposal of waste materials used during construction can harm roots. Keep well outside the CRR.
- Consider the vigor and health of existing trees - no doomed trees or trees with structural problems
- Save rare, threatened, or endangered species
- Save trees designated as national, state, or local champions
- No invasive species
- Value groups of trees
- Selection should be diverse with preference to high quality trees - Shagbark Hickory, Hornbeam, Swamp White Oak and Sycamore.
- Save a good mix of ages and sizes - great trees and designer trees with 8" DBH and 60\% LCR (live crown ratio)
- Remove trees that are leaning over the site of future structures. Trees that have more than a $40 \%$ lean or show signs of heaving should be removed (USFS)-Urban Tree Risk Management.
- It is recommended that large trees should be located 30-40 feet from a structures foundation. Medium trees should be located 20 ft . from a foundation.
- Save trees located where they will provide direct benefits at the site - shading, privacy, windbreak, buffer from adjacent land use.
- Save Forest stands that are connected to off-site forests that create wildlife habitat and corridors.
- Save trees that are located in protected natural areas such as floodplains, stream buffers, wetlands, erodible soils, critical habitat areas and steep slopes.
- Save Forest stands that are connected to off-site nonforested natural areas or protected land.

## Maintenance

All existing trees and newly planted trees under the auspices of the Tree Committee will be monitored regularly for:

- Watering needs - newly planted trees should receive 10 gallons of water a week. Irrigator bags help to water the trees more deeply and evenly.
- Staking needs - new trees may need to be staked. Stakes should be removed after one year.
- General health with special attention to invasive insects and diseases such as the Asian Long-horned Beetle and the Emerald Ash Borer.
- Pruning needs - proper pruning contributes greatly to the structure and vigor of the tree.

The Tree Committee will work with community volunteers, the Highway Department, the Recreation Department, and arborists and foresters in the care of our public trees.

A meeting with the Tree Committee and Highway Department may help when large municipal pruning projects are planned by the utilities.

## Outreach

The Town of Red Hook Tree Preservation Commission seeks opportunities for cooperative partnerships between the town, individuals, agencies, organizations and utility providers.

Communities where forestry has continued to do well were those communities where good management was supported by a long-term program of maintaining public support through information and education programs. (Robert Miller, author of Urban Forestry, Planning and Managing Urban Greenspace)

- Work with various community organizations
- Work with other town committees, boards and Highway Department
- Work with schools to involve children in learning about the benefits of trees. We have a program that involves K-3 students at Mill Road Elementary School that is done for two weeks leading up to Arbor Day. The Linden Avenue Middle School Who Cares? Environmental Club participates in our fall and spring planting sessions.
- Involve community volunteers in tree planting projects

- Distribute tree information on community days - Arbor Day and Hardscrabble Day
- Monthly reports to the Town Board
- Investigate video programing for PANDA segments
- Maintain an up-to-date page on the Town website
- Press releases and articles for various periodicals
- Commemorative Tree Program (see addendum)
- Offer workshops on good tree care to community members
- Develop a Great Trees of Red Hook Program

Historic tree - trees associated with a historic or cultural events, Age - trees that are remarkably old, Unique - trees that are unusual in size, shape, or growing range, have survived through difficult circumstances, or significant in folklore

## Master Tree List

A Master Tree List is a work in progress. There is no definitive list. It should reflect the community's hardiness zone, stocking levels and site requirements. Some species, such as, sugar maples, are exhibiting stress as a result of climate change. Ash trees are not being recommended because of the Emerald Ash Borer. Ailanthus (Tree of Heaven) and Norway Maples are on the invasive species list. There is always the question of using only native species. Jim Robbins author of The Man Who Planted Trees and frequent contributor to The New York Times wrote,

The plants people choose for their yards are appealing for showy colors or shapes, not for their ecological role. Studies show that native oak trees in the Mid-Atlantic States host as many as 537 species of caterpillars, which are important food for birds and other insects. Willows come in second with 456 species. Ginkgo, on the other hand, which is not native, supports 3 species, and zelkova, an exotic plant used to replace elm trees that died from disease, supports none.

At this time we are taking the stand that there is room for natives and exotics, but with a discerning eye.

We have chosen to use the list compiled by former DEC Forester for Region 3, Lou Sebesta. Some edits were done to reflect the most recent data. We will also use Recommended Urban Trees for USDA Plant Hardiness Zone 6 and Colder compiled by the Urban Horticulture Institute Department of Horticulture Cornell University. Nationalgrid also has a very useful list How to Avoid Tree and Utility Line conflicts when selecting and Planting Trees.

See Details Addendum pgs. 31-37

## Professional Contacts

Tree City USA is a program sponsored by the National Arbor Day Foundation in cooperation with the USDA Forest Service and state forestry agencies. Red Hook has been a Tree City for five years. In 2012 we received the Tree City Growth Award. We will continue to participate as it provides direction, technical assistance, public attention and national recognition of urban and community forestry programs in thousands of towns and DEC and Urban Forestry Program. Applications are due the end of December.

- Continue to be a member of the NYS Urban and Community Forestry Council
- Attend tree related conferences and workshops
- Employ the expertise of professional consultants, such as, certified arborists and urban foresters on an as need basis.
- Work closely with our local forester at the DEC center in New Paltz.
- Work with Dutchess County Cooperative Extension and Dutchess County Soil and Water.

## ADDENDUM

## Town of Red Hook Tree Preservation Commission

7340 South Broadway, Red Hook, NY 12571 845-758-4600

## COMMEMORATIVE TREE PROGRAM: APPLICATION FORM (TRHTPC2013)

Today's Date: $\qquad$
Donor's Name: $\qquad$
Donor's Address: $\qquad$
City: $\qquad$ State: $\qquad$ Zip: $\qquad$
Telephone: (Home) $\qquad$ (Work) $\qquad$

Orders taken from April 1 through August 31 will be planted during the fall planting season. Those orders taken from September 1 through March 31 will be planted in the spring. You will be notified as to when and where the planting will take place.

In Commemoration of: $\qquad$

## INSCRIPTION

Dedicated to: $\qquad$
In Memory of: $\qquad$
$\qquad$
$\qquad$
Tree Dedicated by: $\qquad$

Do you want the donor's name to appear in the Commemorative Tree Registry which is also on our town's website? Yes: $\qquad$ No: $\qquad$

Cost: Suggested \$200
Make check out to "Town of Red Hook", in notation: "Commemorative Tree"

# Town of Red Hook Tree Preservation Commission 

7340 South Broadway, Red Hook, NY 12571 845-758-4600

## COMMEMORATIVE TREE GUIDELINES

Trees can memorialize or honor a departed loved one, living friends, family and pets that will mature with the seasons into a lasting remembrance. Others may want to plant a "family tree" to commemorate a birth of a child, marriage, anniversary or graduation or simply to enhance the local environment.

- You may request a specific type of tree.
- The location for the tree will be determined by your suggestions and by the needs of the Commission primarily in public spaces.
- Information on the tree donor, location and the date the tree is planted will be kept in a Registry.
- The maximum size tree that can be planted, that will have the best chance of survival, is a 2.5 inch caliper tree. Caliper is the diameter of the tree measured at 6 inches above the ground.
- Planting will be done in the spring and fall.
- A certificate will be given to the donor as a token of the Commission's appreciation as well as being a permanent record of the tree.
- Commemorative Engraved Stone can be independently purchased. The Commission will place the marker at the tree's front even with the ground.
- Some suggested trees are on this list based on availability and planting conditions

## Recommended Trees:

Small: Flowering Crabapple, Goldenraintree, Thornless Cockspur Hawthorn, Eastern Redbud, Autumn Brilliance Serviceberry, Hedge Maple, Jack and Jill Callery Pear

Medium: Callery Pear, Hardy Rubber Tree, Katsura, Linden
Large: Ginko (male only), London Plane, Honey Locust

## How To Plant A Tree

1. Dig a hole that is two to three times as wide as the root spread, container diameter, or balled and burlapped root ball. The hole should be no deeper than the root ball height or depth of soil in the container. The hole should be shallow enough that the root collar of the tree will be exposed when planted
2. Break up any compacted soil on the sides of the planting space and make sure the bottom of the hole is firm to prevent settling
3. Remove all string or wiring from the bare root and container grown trees. Remove the container from container grown trees and shake off any excel soil.
4. Prune any dead, deceased, broken, or circled roots on bare root or container grown trees.
5. Place the tree upright. Make sure roots of bare root trees are relatively straight and spread out. Straighten the tree in the hole and check that the root collar is visible at soil level.
6. Remove burlap, rope, and wire basket away from root ball on balled and burlapped trees.
7. Gently pack backfill soil around base of root ball. Allow rest of backfill to settle naturally, use water to settle, or tamp lightly. Continue to fill the planting hole with soil up to the tree base.
8. Install tree shelters or stakes if needed. If staking is necessary, use one or two stakes with separate flexible ties and remove after 1 year. Stakes should be extended into undisturbed soil
9. Apply a 2- to 24 -inch layer of mulch over the entire rooting area, leaving a 3-incbh circle of bare soil around the trunk
10. Water the tree thoroughly and do not fertilize the first year.

3 Quercus coccinea Scarlet Oak (RL)

Spring 2013 (17) (RP)
3 Acer rubrum 'Bowhall'
6 Syringa reticulata‘Ivory Silk'
4 Malus 'Pink Spire’
2 Prunus x Acccolade
2 Kwanzan Cherry

## List of Trees and Shrubs Planted

Fall of 2013 (3)
1 Acer rubrum 'Red Sunset' (RR)
1 Tilia 'Legend ' (RR)
1 Malus 'Snowdrift' (RHHD)

Tree placement Key
Town of Red Hook Recreation Park - RP
Wetlands - WLW
Saint Margaret's - SM
Town of Red Hook Town Hall - TH
Red Church Cemetery - RCH
Guski Road - GR
Rockefeller Lane - RL
River Road - RR
Red Hook Highway Department - RHHD

A total of 47 trees and shrubs have been planted at the Rec. Park. 3 did not survive.
140 tree and shrub seedlings were planted to strengthen the riparian buffer along the Saw Kill stream at the Rec. Park. About 40 did not survive due to some vandalism and some expected losses. An additional 35 seedlings were planted to make up for the loss.

Approximately $\$ 3,000$ has been spent so far. We are proposing an additional $\$ 1,000$ for the spring planting for the parking lot.

# Recommended Urban Trees for the Mid to Lower Hudson Valley <br> <br> DEC Region 3 

 <br> <br> DEC Region 3}

Prepared by Lou Sebesta
Dec Region 3 Forester
Use this guide as an aid to choosing the right tree for your planting site. Trees listed are cold hardy to USDA Hardiness Zone 5b unless otherwise noted. Know your hardiness zone before selecting a tree. Consider the species diversity of the existing community forest. It is recommended that there be a $5 \%$ to $10 \%$ limit of any one tree species. Planting trees with a maximum caliper of $2^{\prime \prime}$ is much less challenging and less costly than planting large stock. Stress is minimized and established is more successful. Water more in early years, especially in heat and drought, to help roots get better established. Prune trees while young to train for street form and structure.

## Small Trees > 35' For Restricted Spaces and Under Utility Wires

- Acer buergeranum - Trident Maple
- Acer campestre - Hedge Maple

Queen Elizabeth
St. Gregory

- Acer saccharum - Sugar Maple
'Sugar Cone'
- Acer tartaricum - Tartarian Maple
- Acer tartaricum ssp. Ginnala - Amur Maple
'Beethoven'
'Flame'
'Embers'
'Mozart'
- Amelanchier Canadensis - Shadblow Serviceberry
'Reflection'
'Spring Glory'
'Tradition'
- Amelanchier x grandiflora - Apple Serviceberry
'Autumn Brilliance'
Cole's Select'
'Princess Diana'
'Robin Hill'
- Amelanchier laevis - Allegheny Serviceberry
'Cumulus'
'Majestic'
'Snowcloud'
- Cercis Canadensis - Eastern Redbud
- Cotinus - Smoke Tree
- Crataegus crusgalli var. inermis - Thornless Cockspur Hawthorn
'Crusader'
- Crataegus laevigata - English Hawthorn
'Crimson Cloud'
- Crataegus phaenopyrum - Washington Hawthorn (thorns may require pruning)
- Crataegus punctate var. inermis - Dotted Hawthorn
'Ohio Pioneer' (mostly thornless)
- Crataegus viridis - Green Hawthorn
'Winter King' (some thorns)
- Koelreuteria paniculata - Goldenrain Tree
- Malus spp. - Flowering Crabapple (many varieties in addition to the ones listed here)
'Donald Wyman'
'Harvest Gold’
'Pink Spire’
'Prairifire
'Professor Sprenger'
'Snowdrift'
'Sugar Tyme'
- Prunus sargentii - Sargent Cherry
'Columnaris'
- Prunus sargentii x P. subhirtella - Flowering Cherry
'Accolade'
- Prunus - Cherry
'Snow Goose
- Pyrus betulaefolia - Birchleaf Pear
"Dancer'
- P. calleryana x P. betulaefolia - Callery Pear
'Edgewood'
- Pyrus calleryana - Callery Pear
'Jack'
'Jill'
'Valliant'
'Cleveland Pride'
- Pyrus fauriei - Korean Sun Pear
'Westwood'
- Pyrus ussuriensis - Ussurian Pear
'Mountain Frost'
'Prairie Gem'
- Parrotia persica - Persian Parrotia
- Robinia pseudoaccacia - Black Locust
'Globe'
'Bessoniana'
- Sorbus x thuringiaca - Oakleaf Mountain Ash
'Fastigata'
- Sorbus x hybrid - Oakleaf Mountain Ash (very similar to above)
- Syringa reticulate - Japanese Tree Lilac
'Ivory Silk'
'Summer Snow'
- Viburnum sieboldii - Siebold Viburnum
- Zelkova serrate - Japanese Zelkova
'Wireless'

## Medium to Large Trees > 35' For Large Spaces

- Acer X freemanii - Freeman Maple
'Autumn Blaze'
'Armstrong'
'Celebration'
'Scarlet Sentinel'
- Acer rubrum - Red Maple
'Autumn Flame'
'Bowhall'
'October Glory'
'Red Sunset'
- Acer saccharinum - Silver Maple (not suitable for streetscapes)

Give wide open spaces and wetter areas
'Silver Queen'
'Blair'
'Northline'

- Acer saccharum - Sugar Maple ( better suited to natural parks and open spaces. Not salt tolerant.
- Aesculus X carnea - Ruby Red Horschestnut
'Briotii'
'Oneil'
'Fort McNair'
- Betula nigra - River Birch
'Heritage'
'Dura-Heat
- Carpinus betulus - European Hornbeam (narrow forms)
'Fastigiata'
'Columnaris'
'Franz Fontaine'
- Catalpa speciosa - Catalpa (large fruits may be problem on streets)
- Celtis laevigata - Sugar Hackberry
'All Seasons' (sheds less)
- Celtis laevigata x occidentalis - Hackberry
'Magnifica'
- Celtis occidentalis - Common Hackberry
'Prairie Pride'
- Cercidiphyllum japonicum - Katsura Tree ( give wider tree lawns and open spaces)
- Cladrastus kentukea - Yellowwood
- Corylus colurna - Turkish Filbert (edible nuts fruit can be litter problem)
- Eucommia ulmoides - Hardy Rubber Tree
- Fraxinus Americana - White Ash ( Not recommended because of Emerald Ash Borer)
- Fraxinus Pennsylvania - Green Ash (Not recommended because of Emerald Ash Borer)
- Ginkgo Biloba (male only) - Ginkgo
'Autumn Gold
'Emperor'
'Golden Globe’
'Magyar
'Saratoga'
'Shgangri-la'
'Princeton Sentry' (narrow variety)
'Lakeview'
- Gleditsia tricanthos var. inermis - Thornless Honeylocust ( may be overplanted)
'Fair view'
'Green Glory’
'Halka'
'Imperial’
'Shademaster'
'Skyline'
'Morraine’
'True Shade'
- Gymnocladus dioicus - Kentucky Coffeetree (use male to avoid fruit litter)
- Liquidambar styraciflua - American Sweetgum
'Gold Dust'
'Grandmaster'
'Moraine'
'Roujdaloba'
'Worplesdon'(zone6)
- Maclura pomifera - Osage Orange (virtually thornless no fruit litter)
'Double O'
'Park'
'Wichita'
- Metasquoia glyptostroboides - Dawn Redwood ( drops it needles in the fall )
- Nyssa sylvatica - Black Gum Black Tupelo (fine specimen tree for residential areas)
- Ostrya - American Hophornbeam called Ironwood
- Phellodendron amurence - Amur Corktree (use male to avoid litter and invasiveness)
'His Majesty'
'Macho'
'Shademaster'
- Plantanus x acerifolia - London Planetree (give adequate space for root growth)
'Bloodgood
'Columbia’ (zone 6)
'Liberty'
'Metroshade’
'Yarwood' (zone 6)
- Prunus sargentii - Sargent Cherry (cherries short-lived max 50 years)
'Columnaris (shorter, narrower)
- Pyrus calleryana - Callery Pear
'Aristocrat'
'Chanticleer'
'Autumn Blaze'
'Redspire'
(Avoid 'Bradford' due to weak branch structure)
- Quercus acutissima - Sawtooth Oak (smaller size)
- Quercus bicolor - Swamp White Oak
- Qucypercus coccinea - Scarlet Oak (better red fall color than a Pin Oak)
- Quercus macrocarpa - Bur Oak or Mossycup Oak (plant small caliper, give space)
- Quercus palustris - English Oak
'Rosehill'
'Skymaster'
Columnar forms:
'Crimson spire'
'Regal Prince'
'Skyrocket'
- Quercus rubra - Red Oak (give adequate space)
- Quercus shumardii - Shumard Oak (Zone 5b/6a)
- Styphnolobium japonicum - Pagodatree or Scholartree
'Millstone'
'Princeton Upright'(Zone 6, narrower)
'Regent'
- Taxodium distichum - Baldcypress
'Apache Chief'
'Monarch of Illinois'
Narrow forms:
'Fastigiata'
'Shawnee Brave'
- Tilia Americana - Basswood (give space, drought sensitive)
'Boulevard'
'Legend'
'Fastigata'
'Lincoln'
'Redmond'
- Tilia cordata - Littleleaf Linden
'Chancellor'
'Corinthian'
‘Glenleven’
'Greenspire
'Rancho'
'Shamrock'
- Tilia x euchlora - Crimean Linen ( more aphid resistant than T. cordata
'Laurelhurst' (more compact)
- Tilia tomentosa - Silver Linden
'Green Mountain’
'Sterling Silver'
'Satin Shadow'
- Ulmus Americana
'New Harmony'
'Princeton'
'Valley Forge' (most tolerant from Dutch Elm disease)
- Zelkova serrate - Japanese Zelkova
'Village Green'
'Green Vase'
'Halka'
- Ulmus parvifolia - Chinese Lacebark Elm
'Allee’
'Athena’
'Dynasty'
‘Ohio'
- Ulmus x species - Elm hybrids, not American (all Dutch Elm Disease resistant)
'Accolade'
'Danada'
'Charm'
‘Discovery’
'Frontier'
'Patriot'
'Prospector' (smaller)
'Vanguard'
